MCM Cosmic 32M Stripping Blades

Used In These
Machines

MCM Cosmic
Cosmic 32M
Komax Delta 50

The MCM Cosmic 32M Machines use a single set of "Universal" Stripping Blades to remove the insulation from the end of a wire. Mechtrix blades for the Cosmic 32M Machines are made to precision standards from a specially selected tool steel to insure optimum performance and blade life.

In addition to the "Universal" Stripping Blades, Mechtrix also offers both our patented M-Series and Full Radius stripping form geometries for processing difficult insulations in the MCM Cosmic 32M. Please contact Mechtrix for assistance in selecting the appropriate style and size blade for your particular application.
