Carpenter Model 90 Wire Strippers

Used In These
Machines

Carpenter
Model 90

The Carpenter Model 90 Machines use a single set of "Universal" Stripping Blades to remove the insulation from the end of a wire. Mechtrix blades for the Carpenter Model 90 Machines are made to precision standards from a specially selected tool steel to insure optimum performance and blade life and are produced using state-of-the-art manufacturing techniques. The state-of-the-art manufacturing techniques are combined with patented Mechtrix technology to produce perfect stripping form radii.

In addition to the "Universal" Stripping Blades, Mechtrix also offers both our patented M-Series and Full Radius stripping form geometries for processing difficult insulations in the Carpenter Model 90 Machines. Please contact Mechtrix for assistance in selecting the appropriate style and size blade for your particular application.
