Mechtrix manufactures a complete selection of cut-off and stripping blades for the AMP Ampomator Machines with either the No. 453406 or No. 681107 Shear Housing. Mechtrix Ampomator Cut-off and Stripping Blades are made to precision standards from a specially selected tool steel to insure optimum performance and blade life and are produced using state-of-the-art manufacturing techniques. Mechtrix Ampomator Stripping Blades have the Mechtrix patented feature of a cutting form which includes a perfectly formed cutting radius. The perfectly formed cutting radius insures optimum cutting of the insulation while the entry angle improves the blade's "gathering" characteristics, thus eliminating the need for wire guides. Please contact Mechtrix for assistance in selecting the appropriate size blade for your particular application.
