Casting C301 Stripping Blades

Used In These
Machines

Casting
C301

The Kodera Casting C301 Machines use a single set of "Universal" Stripping Blades to remove the insulation from the end of a wire. Mechtrix blades for the Kodera C301 Machines are made to precision standards from a specially selected tool steel and micro-grain carbide to insure optimum performance and blade life. State-of-the-art manufacturing techniques are combined with Mechtrix patented technology to create perfect stripping form radii which produce the highest quality cutting tool possible.

In addition to the "Universal" Stripping Blades, Mechtrix also offers both our patented M-Series and Full Radius stripping form geometries for processing difficult insulations in the Kodera C301 Machines. Please contact Mechtrix for assistance in selecting the appropriate style and size blade for your particular application.

Casting C301 Universal Blades

Mechtrix Description	Mechtrix Part Number	Blade Form Diameter		OEM Part Number
		(in)	(mm)	
C301UV Universal Strip Blade-Front	30704	-	-	-
C301UV Universal Strip Blade-Back	30705	-	-	-

Casting C301 M-Series Blades

Mechtrix Description	Mechtrix Part Number	Blade Form Diameter		OEM Part Number
		(in)	(mm)	
M-Series Blades are available in 0.1mm increments in the following sizes: C301M-0.3 thru C301M-7.0 Front and Back	-	-	-	-

Casting C301 Full Radius Blades

Mechtrix Description	Mechtrix Part Number	Blade Form Diameter		OEM Part Number
		(in)	(mm)	
Full Radius Blades are available in 0.1mm increments in the following sizes: C301-0.4D thru C301-7.0D Front and Back	-	-	-	-

A set of blades for the Casting C301 consists of one (1) C301 Strip Blade-Front and one (1) C301 Strip Blade-Back.

Mechtrix "Kodera" Stripping Blades are protected by U.S. Patent 4,630,406 and U.S. Patent 4,577,405
