The Schleuniger CS-9000 Machine uses a single set of "Universal" Stripping Blades to remove the insulation from the end of a wire. Mechtrix blades for the CS-9000 are made to precision standards from specially selected tungsten carbide to insure optimum performance and blade life.

In addition to the "Universal" Stripping Blades, Mechtrix also offers both our patented M-Series and Full Radius stripping form geometries for processing difficult insulations in the CS-9000. Mechtrix M-Series and Full Radius Blades for the Schleuniger CS-9000 are made to precision standards from a specially selected tool steel to insure optimum performance and blade life. Please contact Mechtrix for assistance in selecting the appropriate style and size blade for your particular application.
