Used In These Machines

Schleuniger CS-9100

The Schleuniger CS-9100 Machine uses a single set of "Universal" Stripping Blades to remove the insulation from the end of a wire. Mechtrix blades for the Schleuniger CS-9100 are made to precision standards from a specially selected tool steel or specially selected tungsten carbide to insure optimum performance and blade life.

In addition to the "Universal" Stripping Blades, Mechtrix also offers both our patented M-Series and Full Radius stripping form geometries for processing difficult insulations in the CS-9100. Please contact Mechtrix for assistance in selecting the appropriate style and size blade for your particular application.
