Mechtrix “KA433” Series Stripping Blades are used in the Schleuniger CrimpCenter 36/60/61/62/63/64/65/67 and CrimpCenter 70 Wire Processing Machines (formerly the GHW SA1 and SA2). “KA433” Stripping Blades are a “V” Style Stripping Blade and are designed to process a range of wire diameters. Mechtrix “KA433” Stripping Blades are made to precision standards from a specially selected tool steel to insure optimum performance and blade life and are produced using state-of-the-art manufacturing techniques. “KA433” Stripping Blades have the Mechtrix patented feature of a cutting form which includes a perfectly formed cutting radius.

In addition to the standard replacement stripping blades, Mechtrix also offers our patented M-Series and Full Radius stripping form geometries for processing difficult insulations in the Schleuniger CrimpCenter Machines. Please contact Mechtrix for assistance in selecting the appropriate style and size blade for your particular application.
