Komax Kappa 240 Stripping Blades

Used In These
Machines

Komax
Kappa 240

The Komax Kappa 240 Machines use a single set of "Universal" Stripping Blades to remove the insulation from the end of a wire. Mechtrix blades for these Komax Machines are made to precision standards from a specially selected tool steel to insure optimum performance and blade life. State-of-the-art manufacturing techniques are combined with Mechtrix patented technology to create perfect stripping form radii which produce the highest quality cutting tool possible.

In addition to the "Universal" Stripping Blades, Mechtrix also offers both our patented M-Series and Full Radius stripping form geometries for processing difficult insulations in the Komax Kappa 240 Machines. Please contact Mechtrix for assistance in selecting the appropriate style and size blade for your unique application.
