Komax Kappa 310 Stripping Blades

Used In These Machines

Komax
Kappa 310

The Komax Kappa 310 Machines use a single set of "Universal" Stripping Blades to remove the insulation from the end of a wire. Mechtrix blades for the Komax Kappa 310 Machines are made to precision standards from a specially selected tool steel and micro-grain carbide to insure optimum performance and blade life. State-of-the-art manufacturing techniques are combined with Mechtrix patented technology to create perfect stripping form radii which produce the highest quality cutting tool possible.

In addition to the "Universal" Stripping Blades, Mechtrix also offers the OEM style Radius V-Blade stripping form geometries for processing difficult insulations in the Komax Kappa 310 Machines. Please contact Mechtrix for assistance in selecting the appropriate style and size blade for your particular application.
