## Komax Kappa 350 Stripping Blades

Used In These  
Machines

**Komax**  
Kappa 350

The Komax Kappa 350 Machines use two sets of blades. A set of "Universal" Blades to cut the wire to length and another set of Stripping Blades to remove the insulation from the end of the wire. Mechtrix blades for the Komax Kappa 350 Machines are made to precision standards from a specially selected tool steel to insure optimum performance and blade life. State-of-the-art manufacturing techniques are combined with Mechtrix patented technology to create perfect stripping form radii which produce the highest quality cutting tool possible.
