Stripper/Crimper

Mechtrix manufactures a complete selection stripping blades for the AMP Stripper/Crimper Machines. Mechtrix AMP Stripper/Crimper Blades are made to precision standards from a specially selected tool steel to insure optimum performance and blade life and are produced using state-of-the-art manufacturing techniques. Mechtrix AMP Stripper/Crimper Blades have the Mechtrix patented feature of a cutting form which includes a perfectly formed cutting radius. The perfectly formed cutting radius insures optimum cutting of the insulation while the entry angle improves the blade's "gathering" characteristics, thus eliminating the need for wire guides. Please contact Mechtrix for assistance in selecting the appropriate size blade for your particular application.
