Schleuniger UniStrip 2300

Used In These Machines

Schleuniger
US-2300

The Schleuniger US-2300 Machines use a single set of "Universal" Stripping Blades to remove the insulation from the end of a wire. Mechtrix blades for the Schleuniger US-2300 Machines are made to precision standards from a specially selected tool steel or specially selected tungsten carbide to insure optimum performance and blade life.

In addition to the "Universal" Stripping Blades, Mechtrix also offers both our patented M-Series and Full Radius stripping form geometries for processing difficult insulations in the US-2300. Please contact Mechtrix for assistance in selecting the appropriate style and size blade for your particular application.
