Komax bt 712, bt 722, bt 752 Stripping Blades

Used In These
Machines

Komax
bt 712
bt 722
bt 752

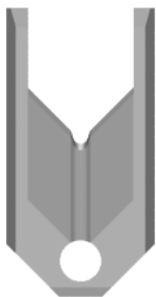

The Komax bt 712, bt 722 and bt 752 Machines use a single set of blades to remove the insulation from the end of a wire. Mechtrix blades for the Komax bt 712, bt 722 and bt 752 Machines are made to precision standards from a specially selected tool steel to insure optimum performance and blade life. State-of-the-art manufacturing techniques are combined with Mechtrix patented technology to create perfect stripping form radii which produce the highest quality cutting tool possible.

In addition to the OEM style Radius V-Blade stripping form geometries, Mechtrix also offers our patented M-Series and Full Radius stripping form geometries for processing difficult insulations in the Komax bt 712, bt 722 and bt 752 Machines. Please contact Mechtrix for assistance in selecting the appropriate style and size blade for your particular application.
